BEFORE YOU BEGIN

Important Information for Students

Before beginning this course, become familiar with the information in this section, as it outlines differences between eLearning content and the NetSuite application.

This section contains supplemental information on the differences between eLearning content and the NetSuite application. The exercises in this student guide were verified to ensure accuracy and this student guide was updated accordingly.

This section highlights the eLearning content that may differ from the current NetSuite release

General changes:

Small differences between course materials and recordings, not related to an official NetSuite Release or older release, include:

- Subtle changes to the look of dashboard portlets.
- The SuiteApps tab shows in the NetSuite account and across NetSuite centers.
- Some UI Menu paths have been changed, such as Bill Sales Order is now Invoice Sales Orders.
- Recorded demonstrations may use slightly different data.
- New Feature Training is now referred to as New Feature Previews.
- Training Videos are now referred to as Videos.
- Help topics referenced in the eLearning may have had slight name changes.
- All exercises have been moved to the end of their respective modules.

Release-related changes:

This section highlights the eLearning- content that may differ from the current NetSuite release.

- ❖ [Delete All Data](#)
- ❖ [Subsidiaries Settings Manager](#)
- ❖ [Multi Subsidiary Customer](#)
- ❖ [Administrators No Longer Required to Provide Initial Passwords for New Users](#)
- ❖ [Changes to Role Record](#)
- ❖ [Advanced Employee Restrictions](#)
- ❖ [Personalize Dashboard](#)
- ❖ [Employee Access Permission](#)
- ❖ [Administrator Role Added to the List of Roles](#)
- ❖ [User Registration Link Expiration in Hours](#)
- ❖ [Worldwide Support for Phone Number Formatting](#)
- ❖ [Changes to Account and Role Selection Pages](#)

Delete All Data

Please be aware that the Delete All Data option is no longer available in NetSuite Accounts. Please contact NetSuite Technical Support.

Subsidiaries Settings Manager

This may not be in the eLearning for Enable Features and Setup.

Subsidiary Settings Manager is used to manage features and define additional settings for one or more subsidiaries. Navigate to **Setup > Company > Setup Tasks > Subsidiary Settings Manager**.

- Manage subsidiary-specific features that require additional setup before you can use them.
- After enabling a subsidiary-specific feature, on the Enable Features page, that feature is available on the Subsidiary Settings Manager page.
- View the state of subsidiary-specific features relative to the list of subsidiaries.
- The Subsidiary Settings Manager page supports only the Period End Journal Entries feature.

Multi Subsidiary Customer

This may not be Enable Features and Setup module.

Customer Record Shared with Multiple Subsidiaries: The Multi-Subsidiary Customer feature permits you to share a customer or sub-customer record with multiple subsidiaries. This feature is not compatible with some features and preference. Search the Help Center for multi subsidiary customer information.

If enabled, the Multi Subsidiary Feature changes customer records and some reporting.

Administrators No Longer Required to Provide Initial Passwords for New Users

This may not be in the Roles, Permissions and Security module.

Administrators are no longer required to provide an initial password to new users because standard NetSuite user access email templates now contain a synthetic field that triggers the generation of a temporary URL with a verification code that is included in the email sent to new users accessing NetSuite.

New users can click the URL in the notification email and create their own NetSuite passwords.

There is also a new company setting on the General Preferences page. Go to **Setup > Company > General Preferences**. The setting is **User Registration Link Expiration In Hours**.

You can set the length of time that the URL generated by the synthetic field remains valid. By default, the expiration in hours value is set to 24 hours, which is hard coded in the standard user access email templates. Valid values range from one hour to 72 hours.

If you change the default value for the setting, you must also update the value in the email templates.

Changes to Role Record

This may not be in the Roles, Permissions and Security module.

Subsidiaries Restrictions: On the role record, enhancements have reconfigured subsidiary restrictions. These changes make it cleared on how to assign subsidiary restrictions to roles. These changes are in the new Subsidiary Restrictions section.

Restrictions Subtab in Role Record: The **Restrictions** subtab is used to set department, class, and location restrictions. This was previously above all subtabs.

Advanced Employee Restrictions: This functionality gives administrators more flexibility and control over what employee information certain roles can access in NetSuite.

Authentication Section in Custom and New Role: May be used for additional role definition and access security measures.

Advanced Employee Restrictions

This may not be in the Roles, Permissions and Security module.

The screenshot shows a 'Permissions' section with two options:

- ☒ **GLOBAL PERMISSIONS**
PROVIDE GLOBAL PERMISSIONS TO EMPLOYEES THAT APPLY TO EVERY ROLE GRANTED TO THE EMPLOYEE.
- ☐ **ADVANCED EMPLOYEE PERMISSIONS**
EXPOSE PARTIAL EMPLOYEE DATA TO USERS WHILE RESTRICTING SENSITIVE AND CONFIDENTIAL INFORMATION FROM USERS WHO SHOULD NOT HAVE ACCESS.

Advanced Employee Permissions: This functionality gives administrators more flexibility and control over what employee information certain roles can access in NetSuite.

Personalize Dashboard

This may not be in the Navigate the Application module.

The **Personalize Dashboard** panel or window now display content with different organization. Click the **Personalize** link to open the panel. Portlets are now organized under:

- **Standard Content** displays the content you can add to your dashboard.
- **SuiteApps** displays SuiteApps installed in your account that include a dashboard component.
- **Currently Used** displays the portlets currently in use on the dashboard.

Employee Access Permission

This may not be in the Roles, Permissions and Security module.

It is possible to see differences in Employee Access permissions and restrictions between different roles. Differences in Employee Access permissions are shown in their own category called Employee Access. This is useful when you want to compare Employee Access permissions between a customized role and the role on which it is based.

Note: The Advanced Employee Restrictions feature should be enabled to use implement this update.

Administrator Role Added to the List of Roles

This may not be in the Roles, Permissions and Security module.

Additional information is available about the Administrator role. The Standard Administrator role is now available in the list of roles on the Manage Roles page. Click the role name to see the role configuration. You cannot customize the Administrator role; the Customize and Edit buttons are not available.

The Administrator role page shows all permissions in the system assigned with Full access level or the highest access level available for the given permission and provides an easy way to see all users who have the Administrator role assigned.

To see a list of roles available in your account, go to **Setup > Users/Roles > Manage Roles** to open the Manage Roles page.

User Registration Link Expiration in Hours

Access from **Setup > Company > General Preferences**. Define the number of hours before the URL for new user access provisioning will expire. The default value is 24 hours; valid values range from one (1) hour to 72 hours.

The default value, 24 hours, is hard coded in the in the following standard user access templates:

- Customer Center Access Email
- Partner Center Access Email
- User Access Email

Changing the default value in General Preferences, requires updating the value in the user access email templates.

Worldwide Support for Phone Number Formatting

NetSuite's worldwide phone number formatting:

- Is supported, in both the user interface and SuiteScript, for specific countries
- Can be enabled or disabled by the Administrator
- Applies to any phone number entered on records, entry forms, and other forms or places in the NetSuite application

Please search the Help Center for phone number formatting

Changes to Account and Role Selection Pages

Any pages in NetSuite where you are prompted to select an account or role now display a new view of your choices. You may encounter these pages during the login process or when switching roles. Changes to these pages include:

- Grouping of Roles per Account
- Renaming: View My Roles and My Roles
- Default Role Changes

WELCOME

Course Overview and Objectives

Overview

This module provides an overview of this Certification Course.

Objectives

After completion of this course, you should be able to:

- ❖ Understand the flow of the study-day ready to take the certification exam
- ❖ Define the areas you need to focus on
- ❖ Understand the relationships between the different NetSuite Tools
- ❖ Dive into NetSuite features and Capabilities
- ❖ Clarify any areas where you have weaknesses
- ❖ Be more prepared to take the certification exam

NAVIGATE THE APPLICATION

Overview and Objectives

Overview

Introduce using and navigating NetSuite, common terminology, and search options.

Objectives

Upon completion of this module, you will be able to:

- ❖ Utilize NetSuite security measures
- ❖ Recognize NetSuite Web page elements
- ❖ Personalize your Home Dashboard
- ❖ Learn NetSuite Terminology
- ❖ Use Basic Search Options
- ❖ Use Multiple Help Resources

Student Exercises

- 01: Set Your Preferences
- 02: Set Up Your Dashboard
- 03: Use Global Search

WALKTHROUGH | Review Login and Security Measures

Tasks to be Demonstrated	During this walkthrough, we will: ➤ Look at the visitor center ➤ Examine the Company > General Preferences
Use Case/Scenario	Look at the starting point for navigation by investigating a NetSuite Center and page elements:

WALKTHROUGH | NetSuite Center and Web Page Elements

Tasks to be Demonstrated	During this walkthrough, we will review the following elements: ➤ NetSuite Center ➤ Dashboard ➤ Portlet and Release Information ➤ Change Password ➤ Update Security Questions ➤ Set Preferences
Use Case/Scenario	Look at a NetSuite Center and page elements:

WALKTHROUGH | Personalize the Home Dashboard

Tasks to be Demonstrated	During this walkthrough, we will demonstrate the following tasks: ➤ Personalize Create New Dropdown list ➤ Add Content ➤ Use “My Login Audit Portlet” ➤ Define Dashboard Layout ➤ Manage Portlets
Use Case/Scenario	Optimize usage of the Home dashboard through some personalization and definition

WALKTHROUGH | Basic Search Options

Tasks to be Demonstrated	During this walkthrough, we will demonstrate the following tasks: ➤ Global Search ➤ Quick Search Portlet
Use Case/Scenario	Introduce different ways to search for information/records in the NetSuite Account; we can do this as the Administrator or any other role.

WALKTHROUGH | Browser Functionality and NetSuite

Tasks to be Demonstrated	During this walkthrough, we will demonstrate the following tasks: ➤ Open NetSuite in New Tabs of Windows ➤ Review Recent Records
Use Case/Scenario	Learn tips for using NetSuite in the browser and assessing its performance; we will use the Administrator role.

MODULE EXERCISES

Required Exercises	
01	Set Your Preferences
02	Set Up Your Dashboard
03	Use Global Search

EXERCISE 01: Set Your Preferences

Scenario: How do you want your NetSuite pages to look and how do you want to interact with areas of the account?

Use these exercises to:

- Set your preferences for the application “look and feel” and for viewing information. Set preferences for the Searches and the Calendar
- Set color and chart themes

Note: The Home dashboard is represented by the icon . All menu paths will reference.

Set Preferences

- 1 Navigate to **Home > Set Preferences**; the **General** subtab displays automatically.
- 2 In the **User Profile** section, review the signature in the Signature box. If you like you may enter a Department Name, Company Name, and address.
- 3 Click the box to **Add Signature to Messages** from NetSuite.
- 4 In the Localization section, select your Local **Time Zone**. Also review the following and change if necessary:
 - Search Sorting - Set to English (U.S.)
 - First Day of Week – Review help.
- 5 In the Formatting section, select your preferred formats for **Date, Time, and Phone Number**.
- 6 Click the **Appearance** subtab, **Colors** section:
 - Select the COLOR THEME of your choice.
 - In the CHART THEMES section, select your choice.

Note: Refer to Help for more information.

- 7 Click the **Analytics** subtab, in the Search section check mark the following boxes, if not already checked:
 - Show List When Only One Result
 - Quick Search Uses Keywords
 - Global Search Auto Suggest
- 8 Under **Export** section – change the export option to your home operating system: UTF-8 (if it is already set to UTF leave it alone).
- 9 Click the **Activities** subtab and select how you want calendar, task, and phone call information to display. Select (check) the following boxes:
 - **Edit Activities from Calendar**
 - For Send Invitation Emails, click **To All Invitees** button.
 - Select **Public** for Default Event Access Setting for New Events
 - Select **Email** for Default Reminder Type
- 10 In the Tasks & Phone Calls section:
 - Check **Default New Tasks Public**
 - Check **Default New Phone Calls Public**
- 11 Click **Save** when you are done with setting your preferences.

EXERCISE 02: Set Up Your Dashboard

Scenario: Consider how you would like your workspace to look.

In this exercise, you will be able to:

- Define Dashboard Layout
- Choose the portlets you want to display
- Define portlet display placement

Define Dashboard Layout

- 1 Click the **Layout** link, located in the upper-right corner of the Home [] page.
- 2 Using the images, click on one of the following:
 - 2 columns: narrow, wide
 - 2 columns: wide, narrow
 - 3 columns: narrow, wide, narrow
 - Full page

Add Portlets to the Home Dashboard

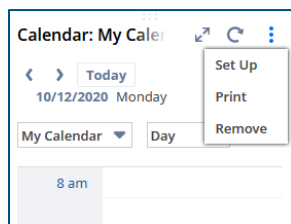

- 3 Click the **Personalize** link, located in the upper-right corner of the Home page.
- 4 The Personalize Dashboard pane opens at the top of the page.
- 5 Click on **Currently Used** and review which portlets are on the dashboard.
- 6 We can use drag and drop functionality to add content to the Home dashboard. Click on **Standard Content** and add, *if necessary*, the following portlets from Standard Content:
 - Calendar
 - Custom Search
 - List
 - My Login Audit
 - Quick Search
 - Reminders
 - Tasks
 - Quick Add – Sales Reps like this portlet

Note: A full screen icon is available for Trend Graph, Report Snapshots, List, Custom Search, Tasks, and Phone Calls portlets. Click the double arrow icon in the upper-right corner of the portlet.

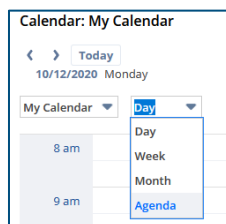

- 7 Click on **Currently Used** again; review the portlets that are now on the dashboard
- 8 Close the Personalize Dashboard pane by clicking the **X** in the top-right corner.

Organize the Home Dashboard Portlets

- 9 Hover over the top of **Calendar: My Calendar** portlet and click on **Set Up**.

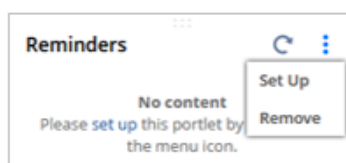

- 10 Review the available display options and then click **Cancel**.
- 11 In the Calendar portlet, find the dropdown list or button (if in a wider column) and change Day (or other time reference) to **Agenda**. This can help you manage your time and activities.

Note: If visible, hide the New Release portlet that NetSuite pushes out to users when a New Release is coming. Hover over the top right-hand side of the title bar and click **Remove**.

- 12 Drag and drop the **My Login Audit** portlet to the top position in a narrow column if it has defaulted to a wide column.
- 13 Hover the top of the **Reminders** portlet and click **Set Up**.

14 View the listed reminders and use the Type dropdown to select **Standard**.

15 In the Select Reminders window, click the following, to add to the right-hand side:

- **Event invitations** to respond to
- **Opportunities to Close** into the Headline section
- Select **Show Reminders with Zero Results**.

16 Click **Save**.

EXERCISE 03: Use Global Search

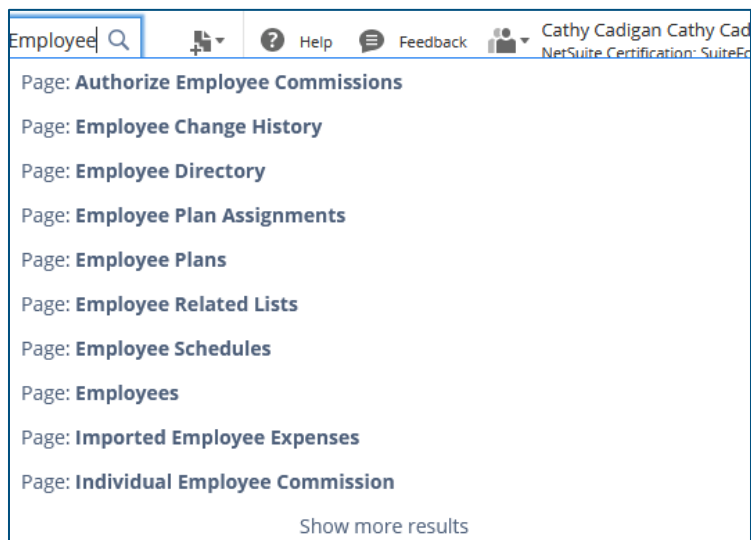

Scenario: Global Search is the best way to search for information in the application.

In this exercise:

- Practice using (Global) Search.

- 1 Enter **employee** in the Global Search field. NetSuite will either start displaying possible results or click **Enter** on your keyboard to see all results.

What types of records are returned? Why are these records returned? You may see something like the following

- 2 Click **Home**.

ENABLE FEATURES AND SETUP

Overview and Objectives

Overview

This module introduces enabling features, reviewing company preferences and use preferences.

Objectives

After completion of this module, you should be able to:

- ❖ Enable Features
- ❖ Set Up Tab options
- ❖ General Preferences
- ❖ Home > Set Preferences
- ❖ Set Up Accounting, Sales, etc.

Student Exercises

This module includes the following hands-on exercises:

- Exercise 01: Set Your Preferences
- Exercise 02: Set Up Your Dashboard
- Exercise 03: Use Global Search

WALKTHROUGH | Enable Features

Tasks to be Demonstrated	During this walkthrough, we will review the following: ➤ Enable Features
Use Case/Scenario	Introduce enable features and how to control functionality in the NetSuite Account. Identify the connection between available features and the provisioning of the account.

WALKTHROUGH | Set Up Tab Options

Tasks to be Demonstrated	During this walkthrough, we will demonstrate the following tasks: ➤ Rename Records / Transactions ➤ Define Auto-Generated Numbers ➤ Review Transaction Numbering Audit Log ➤ Consider Administrative Notifications
Use Case/Scenario	Your NetSuite account may have initial configuration defined, for functionality. As the Administrator, you may further tailor the account, through personalization: ➤ Labels ➤ Number schemes ➤ Audit Log ➤ Notifications

WALKTHROUGH | Preferences

Tasks to be Demonstrated	During this walkthrough, we will demonstrate the following tasks: ➤ General Preferences ➤ Set Printing & Fax Preferences ➤ Set Email Preferences ➤ Review Additional Sandbox information
Use Case/Scenario	Administrators can set company-wide preferences and settings. If using a sandbox, review the related information. Preferences help: ➤ Set consistent data entry ➤ Provide default values ➤ Behavior of email and fax ➤ If using a sandbox, review the related information

WALKTHROUGH | Set Up Accounting Preferences

Tasks to be Demonstrated	During this walkthrough, we will review the following accounting preferences: ➤ General ➤ Items/Transactions ➤ Order Management ➤ Time & Expenses ➤ Approval Routing
Use Case/Scenario	Review the available preferences for Accounting Preferences

Module Exercises

Required Exercises	
01	Enable Features
02	Define Accounting Sales Marketing Support Preference
03	Create Accounting Periods
04	Create New Subsidiaries: OneWorld
05	Manage Tax Periods
06	Set Up a Tax Schedule

EXERCISE 01: Enable Features

Scenario: The administrator is responsible for enabling features per your company's requirements. At this stage, you may not know all the features that you will be using. Other features will be enabled in later modules.

In this exercise:

- Enable key features per discussions and the BRD
- Enable Multi-Language for language translation
- Enable Multiple currencies to conduct and manage books in different currencies

Note: Available features are dependent upon the provisioned account: Billable components, enabled Add-On Modules and Add-on Bundles.

- 1 Navigate to **Setup > Company > Enable Features**. Above the subtabs is a statement regarding Subsidiary Settings Manager:

From Release Notes: The Subsidiary Settings Manager page enables you to manage subsidiary-specific features that require additional setup before you can use them. After you enable a subsidiary-specific feature on the Enable Features page, that feature is available on the Subsidiary Settings Manager page. From the Subsidiary Settings Manager page, you can enable features and define their additional settings for one or multiple subsidiaries. You can also view the state of subsidiary-specific features relative to the list of subsidiaries.

Search the **Help Center for Subsidiary Settings Manager** information.

- 2** Under the **Company** subtab, check the following features: If the features are already checked, leave them checked and do nothing. *Do not UNCHECK anything without direction.*

Feature	Check/Uncheck
Classifications	Departments Locations Classes
Projects	Uncheck any features that are enabled. Projects are not part of this class. Click through any pop-up windows.
ERP General	Uncheck Multiple Units of Measure, if checked. Review the field level help for Use Deletion Reason . Review the field help Multi Subsidiary Customer .
Resource Management	Uncheck Resource Allocations, if checked.
International	Multi-Language confirm or mark as checked. Multiple Currencies - Check this box to conduct business with customers and vendors that use currencies other than the currency in which your company manages its financials. Note: Click OK in the redirect pop-up window. Check Currency Exchange Rate Integration and click I Agree . Review field help for Worldwide Support for Phone Number Formatting and the Help Center: Phone Number Formatting .
Data Management	Inline Editing File Cabinet Duplicate Detection & Merge: Note: Click OK in the redirect pop-up window. Do nothing in Access, Social or Mobile sections, if displayed.

- 3** Go to the **Accounting** subtab; under Revenue Accounting, uncheck Revenue Recognition if necessary.
- 4** Under the **Tax** subtab, check the following features: If the features are already checked, leave them checked and do nothing. *Do not UNCHECK anything without direction.*

Feature	Check/Uncheck
---------	---------------

Advanced Taxes	Check this feature if it is not enabled.
International Tax Reports	Ensure the related SuiteApp is installed. If it is not, install it now and go back to Setup > Company > Enable Features.

5 Go to the **CRM** subtab, select the following features under Basic Features:

- **Customer Support and Service**
- **Marketing Automation**

Note: You will get a pop-up of terms that must be agreed to. To print later, right mouse-click.

6 Scroll to bottom and agree to terms so these features can be turned on.

7 Go to the **Analytics** subtab, Dashboards section and select **KPI Scorecards**, if not already checked.

8 Click **Save**.

9 Go to **Home > Set Preferences, General** subtab. In the Localization section, select your preferred language for each of the following:

- Language from the dropdown list of values.
- Search Sorting from the dropdown list of values.
- Language of the Help Center from the dropdown list of values.

10 Click **Save**.

EXERCISE 02: Define Accounting | Sales | Marketing | Support Preference

Scenario: The administrator can configure how the accounting, sales, marketing, support, and other modules behave in NetSuite.

In this exercise, explore the following:

- Accounting Preferences
 - Sales Preferences
 - Marketing Preferences
 - Support Preferences
- 1** Navigate to **Setup > Accounting > Accounting Preferences**. Review each subtab and options available.
 - 2** Under **General** subtab > **General Ledger**, check **USE ACCOUNT NUMBERS**, and click **Save**.
 - 3** Compare to **Setup > Accounting > Invoicing Preferences**.
 - 4** Navigate to **Setup > Sales > Sales Preferences**. Review settings controlled here, on each subtab. Click on field level help for any settings that are unfamiliar.
 - 5** Navigate to **Setup > Marketing > Marketing Preferences**. Review settings controlled here. Click on field level help for any settings that are unfamiliar.
 - 6** Navigate to **Setup > Support > Support Preferences**. Review settings controlled here, on each subtab. Click on field level help for any settings that are unfamiliar.

EXERCISE 03: Create Accounting Periods

Scenario: Break up the fiscal year into Accounting Periods:

In this exercise:

- Set up accounting periods for the current year and one year beyond As the **Lists > Accounting > Accounts > New**.
- 1** Navigate to **Setup > Accounting > Manage Accounting Periods**. Take note of which Fiscal Years already exists.
 - 2** At the top, left-hand side of the page, click the **Set Up Full Year** button. Enter the following:
 - First Fiscal Month: **January**
 - Fiscal Year End: Enter appropriate **year**
 - Period Format: **Calendar Months**
 - Year in Period Name: **Ending Year of Period**
 - 3** **Do not check** One-Day Year-End Adj. Period.
 - 4** Click **Save**.
 - 5** Continue steps 2 through 3 until you have all years including current year.
 - 6** Confirm by reviewing **Setup > Accounting > Manage Accounting Periods**.

EXERCISE 04: Create New Subsidiaries: OneWorld

Scenario: Per your company's requirements, your Company currently has two subsidiaries and these subsidiaries will process transactions in their local currency. In this exercise:

- Create two subsidiaries.
- *For consideration only: think about what you might need to do to create elimination subsidiaries to eliminate revenue and expenses at the consolidated level, removing the effect of transactions between subsidiaries.*
- **IMPORTANT:** If you create and save the subsidiary with incorrect information, you may not be able to edit that information:
 - Locked fields include Parent Subsidiary, Country, Elimination, Currency, and Edition.
 - The Internal ID cannot be changed.
 - If necessary, mark the incorrect subsidiary inactive and enter in a new subsidiary with the correct information.

1 Navigate to **Setup > Company > Subsidiaries > New**.

2 Enter the following details for the new subsidiary record:

- Name: **Germany**
- Subsubsidiary of: **Parent Company**
- **Uncheck** Subsidiary is Inactive (if checked).
- Document Number Prefix: **DE** (as in Deutschland)
- Currency: **Euro** (If the currency field is not visible, you may not have enabled all the features in in a previous exercise.)
- Country: **Germany**

Note: The Edition field defaults to XX upon choosing the Country.

3 Click **Save** when you have finished. If you are returned to the Subsidiaries page, then click the **View** link next to the Germany subsidiary.

4 Select the **Nexuses** subtab; a Nexus has been created for the Germany subsidiary.

5 Go to **Actions** and select **New**.

6 Repeat these steps to create a subsidiary for United Kingdom using the following details for the new record:

- Name: **British Subsidiary**
- Parent Subsidiary: **Parent Company: Germany**
- **Uncheck** Subsidiary is Inactive, if checked
- Document Number Prefix: **UK**
- Currency: **British Pound**
- Country: **United Kingdom**

7 Click **Save** when you have finished.

EXERCISE 05: Manage Tax Periods

Time: 3-5 minutes

Scenario: Adhere to International tax laws. In this exercise:

- Set up a tax period for the current year
- 1** Navigate to **Setup > Company > Enable Features**.
 - 2** Under the **Tax** subtab, look for the related SuiteApps. Click on the **International Tax Reports** feature.
 - 3** If the International Tax Reports feature has not been installed for the account yet, click **Install**. You will then see its status on the Install Bundles page as **Pending**. This may take a while to complete. You may refresh the page until it shows as **Complete**.
 - 4** Navigate to **Setup > Accounting > Manage Tax Periods** and note which Tax Period already exists.
 - 5** On the top, left side of the page, click the **Set Up Full Year** button. The New Generate Tax Reporting Periods for Full Year page opens.
 - 6** Confirm or enter **January** in First Fiscal Month.
 - 7** In the **Fiscal Year End** field, enter the current year.
 - 8** Ensure Period Format is set to **Calendar Months**.
 - 9** Click **Save**. You may repeat these steps for any future years
 - 10** Verify the period created is for the current year (or the next year) with four quarters.

EXERCISE 06: Set Up a Tax Schedule

Time: 3-5 minutes

Scenario: We are going to utilize Advanced Taxes. In this exercise:

- Define a tax schedule for US
- Also, define tax schedules for Germany and United Kingdom

Create New Currencies

- 1 Navigate to **Setup > Accounting > Tax Schedules > New**. The Tax Schedule page displays.

Note: You may need to scroll down through the menu items.

- 2 In the Product field, type **S1**.
- 3 In the Description field, type **S1**.
- 4 On **Non-US Nexuses** subtab, do the following.

Nexus	Actions
Germany	Sales Tax Code field, select UNDEF-DE from the dropdown list. Purchase Tax Code field, select UNDEF-DE from the dropdown list.
United Kingdom	Sales Tax Code field, select UNDEF-GB from the dropdown list. Purchase Tax Code field, select UNDEF-GB from the dropdown list.

- 5 Click **Save**.

SET UP ITEMS

Overview and Objectives

Overview

Your company needs to effectively manage goods and services that you buy and sell.

Objectives

After completion of this module, you should be able to:

- ❖ Identify implementation considerations and questions
- ❖ Enable item/inventory features and company preferences
- ❖ Set up item types

Student Exercises

- 01: Enable Transactions and Inventory Features/Preferences
- 02: Create Inventory Items
- 03: Create a Non-Inventory Item
- 04: Create a Service Item
- 05: Create an Inventory Item for OneWorld

WALKTHROUGH | Enable Features

Tasks to be Demonstrated:	During this walkthrough, we will enable the following features: ➤ Items and Inventory
Use Case/Scenario	Configure the features to accommodate your strategy with managing and selling goods.

WALKTHROUGH | Accounting

Tasks to be Demonstrated:	During this walkthrough, we will examine the following: ➤ Accounting Preferences ➤ Costing Methods
Use Case/Scenario	Necessary features have been enabled; examine accounting configuration.

WALKTHROUGH | Review an Item Record

Tasks to be Demonstrated:	During this walkthrough, we will examine the following: ➤ Primary Information ➤ Classifications ➤ Subtabs
Use Case/Scenario	In preparation for entering goods and services, that you buy and sell, prepare by examining an item record

WALKTHROUGH | Inventory and Matrix Items - OPTIONAL

Tasks to be Demonstrated:	During this walkthrough, we will demonstrate the following: ➤ Inventory Items ➤ Matrix Items The Administrator will first enable Matrix Items in this account.
Use Case/Scenario	Our company will be selling inventory items. We also may consider matrix items, selling items with various options. Let's look at these item records.

WALKTHROUGH | Non-Inventory Items

Tasks to be Demonstrated:	During this walkthrough, we will demonstrate the following: ➤ Non-Inventory Items ➤ Non-Inventory Item Conversion
Use Case/Scenario	Our company also will be using non-inventory items and will investigate for purchase, for sale and for resale. Commonly, companies will set up non-inventory items for the software they sell, as well as the module (components) of their product.

WALKTHROUGH | Service Items

Tasks to be Demonstrated:	During this walkthrough, we will demonstrate the following: ➤ Service Items
Use Case/Scenario	We will also offer service on items that that we; consider service items for investigate for purchase, for sale and for resale.

Tip: To learn more about projects, search the **Help Center** for **Projects** topics.

WALKTHROUGH | Assembly, Item Group, Kit/Package

Tasks to be Demonstrated:	During this walkthrough, we will demonstrate the following: ➤ Assembly Items ➤ Item Group ➤ Kit / Package
Use Case/Scenario	What are considerations with putting different components together to sell? They have both accounting and pricing considerations.

Function	Assembly	Kit/Package	Item Group
Members	• Inventory Items • Assemblies • Non-inventory items • Other charges • Service items	• Inventory Items (Serial/Lot) • Assemblies • Non-inventory items • Other charges	• Inventory Items (Serial/Lot) • Assemblies • Kits • Service Items
Pricing	Item price is independent of its members' prices	Item price is independent of its members' prices	Item price is dependent on its members' prices
General Ledger Accounts	Able to identify a COGS, income, and asset account separate from its components' accounts	Able to identify a separate income account	Account designation is specified on the members
Inventory Impact	Building an assembly: Decreases the asset accounts of member item Increases asset account of the assembly	Fulfilling a kit: Decreases the asset account of member items	Fulfilling a group: Decreases the asset account of member items
			ONLY Groups allow you to change members of group on the fly-on transaction record itself

MODULE EXERCISES

Required Exercises	
01	Enable Transactions and Inventory Features/Preferences
02	Create Inventory Items
03	Create Non-Inventory Item
04	Create a Service Item
05	Create Inventory Items; OneWorld

EXERCISE 01: Enable Transactions and Inventory Features/Preferences

Scenario: Before setting up items and testing those items you must ensure that all required features are enabled.

The BRD defines item types and categories, transactions, and inventory management. They use inventory, non-inventory, and service type items.

In this exercise, enable the following features and define the Preferences

- **Transactions:** Basic Features, Shipping & Receiving
 - **Items & Inventory:** Items and Inventory
 - Note: The features in this exercise might be different from those in your purchased NetSuite account.
- 1** Navigate to **Setup > Company > Enable Features**. The **Company** subtab displays.
 - 2** In the ERP General section, confirm or uncheck **Multiple Units of Measure** if checked.
 - 3** Click the **CRM** subtab, go to the Support section and uncheck **Issue Management**, since Chatham will not be using. This removed a corresponding field on item records.

- 4 Click the **Transactions** subtab, ensure that the features in the table below are **checked**, and only **uncheck** when directed, for each of the following sections. Some of these features will be used in later modules.

Feature	Check/Uncheck
Basic Features	Estimates Sales Orders Return Authorizations Purchase Orders Vendor Return Authorizations
Shipping & Receiving	Advanced Shipping Pick, Pack and Ship Advanced Receiving
Billing	Bill Costs to Customers Uncheck Advanced Billing Uncheck Charge Based Billing and any other Billing features listed.

- 5 Click the **Items & Inventory** subtab and ensure that the following features are checked for each of the following sections

Feature	Check /Uncheck
Items	Uncheck Matrix Items Leave Multiple Vendors as checked . Uncheck Bar Coding and Item Labels
Inventory	Multi-Location Inventory: If prompted, click OK to enable Multi-Location Inventory (for OneWorld accounts only). Then click OK two more times. If checked, you may leave Serialized Inventory and Lot Tracking as checked . No other Inventory features should be checked.

- 6 Click **Save** when you are done.
- 7 Navigate to **Setup > Accounting > Accounting Preferences**.
- 8 Select the **Items/Transactions** subtab.
- 9 Go to Default COGS Account and choose **Cost of Goods Sold** or **COGS**.

- 10** Confirm Default Asset Account is set to **1200 Inventory**.
- 11** Go to Default Receivables Account and choose or confirm **1100 Accounts Receivable**.
- 12** Ensure that **Anyone Can Set Item Accounts** is **checked**. You may review field help for more information.
- 13** Click **Save** when you are done.

EXERCISE 02 Create Inventory Items

Scenario: The Chatham Company provides computer hardware and ink. In this exercise, you will set up two inventory items.

- 1 Navigate to **Lists > Accounting > Items > New**.
- 2 Select Inventory Item from the list of available items.
- 3 Enter the following:
 - Item Name/ Number: **HP LJ 1320 Printer**
 - Subsidiary: Select **Parent Company** and check **Include Children**
- 4 On the **Purchasing/Inventory** subtab, enter Purchase Price = **25.00**.
- 5 Scroll down and click the **Vendors** sublist.
- 6 To create a new vendor, in the first column (Vendor), click on the drop down and select - **New**.
 - Enter Company Name = **Test Widget Works**
 - Enter Primary Subsidiary = **Parent Company**
- 7 Click **Save**.
- 8 Go to the Preferred column and **check** the box.
- 9 Go the Purchase Prices field, click the icon to set price by currency.

VENDOR*	CODE	SUBSIDIARY	SCHEDULE	PREFERRED	PURCHASE PRICES
1 Test Widget Works		Parent Company		Yes	

Set Currency

- 10 In the pop-up window, set the **US Dollar** or USA currency and Purchase Price at **\$25.00**.
- 11 Click **Add** and then **OK** to close the pop-up window.
- 12 Click the **Add** button.
- 13 Go to the **Sales/Pricing** subtab.
- 14 Copy and paste **HP LJ 1320 Printer** into the Sales Description.

15 Enter the Item Weight as **20 lb (pounds)**.

16 Go to the **USA** sublist and enter **50.00** in the Base Price field.

17 Click the **Accounting** subtab and confirm accounts or select:

- Confirm COGS Account as **Cost of Goods Sold**
- Confirm Asset Account as **1200 Inventory**
- Confirm Income Account as **4000 Sales**
- Select **S1** from the *Tax Schedule dropdown In the Tax/Tariff section

18 Click **Save & New**. Enter the following:

- Item Name/ Number: **Printer Ink Starter Pack**
- Subsidiary: Select **Parent Company** and **Include Children**

19 Go to the **Purchasing/Inventory** subtab.

20 Item/Cost Detail section enter Purchase Price as **15.00**.

21 Scroll down and click the **Vendors** sublist.

22 Select **Test Widget Works** from the Vendor dropdown list.

23 Go to the Preferred column and **check** the box.

24 Go the Purchase Prices field, click the icon to set price by currency.

VENDOR*	CODE	SUBSIDIARY	SCHEDULE	PREFERRED	PURCHASE PRICES
1 Test Widget Works		Parent Company		Yes	

Set Currency

25 In the pop-up window, set the US Dollar or USA Currency and Purchase Price at **\$15.00**.

26 Click **Add** and then **OK** to close the pop-up window.

27 Click **Add**.

28 Go to the **Sales/Pricing** subtab.

29 Copy and paste **Printer Ink Starter Pack** into the Sales Description.

30 Click the **Accounting** subtab and confirm accounts or select:

- Confirm COGS Account as **Cost of Goods Sold**

- Confirm Asset Account as **1200 Inventory**
- Confirm Income Account as **4000 Sales**

31 Select **S1** from the *Tax Schedule dropdown list.

32 Click **Save**.

EXERCISE 03: Create a Non-Inventory Item

Scenario: You regularly buy pens as an office supply, to have on hand in your supply rooms. In this exercise:

- Create a non-inventory item resale since you may also sell these items.

1 Navigate to **Lists > Accounting > Items > New**.

2 From the New Item page, locate the **Non-inventory Item** section and click the **For Resale**:

Note: This makes the non-inventory item available on a PO to a vendor and a Sales Order for a customer.

3 The Non-inventory Item for Resale page displays. Enter the following:

- Item Name/Number field, enter **12-Pack Ball Point Pens**
- Subsidiary set to **Parent Company** and **Include Children**.

4 Go to the **Purchasing** subtab. Enter the following:

- Purchase Price = **1.99**
- Purchase Description = **12-pack regular ball point pens, blue ink**

5 Scroll down to the **Vendors** sublist.

6 Choose **Test Widget Works** from the Vendor dropdown list.

7 Ensure that **Preferred** is checked.

8 Go the Purchase Prices field, click the icon to set price by currency.

9 In the pop-up window, set the US Dollar or USA Currency and Purchase Price at **\$1.99**.

10 Click **Add** and then **OK** to close the pop-up window.

11 Click **Add**.

12 Click the **Sales/Pricing** subtab.

13 Enter **12-Pack Ball Point Pen, blue ink** into the Sales Description.

14 Scroll down and enter **10.00** for the Base Price.

15 Click the **Accounting** subtab:

- Confirm Income Account as **4000 Sales**.
- Confirm the Expense Account to **6150 Office Expense**.

16 In Tax Schedule, confirm or enter **S1**.

17 Click **Save**.

EXERCISE 04: Create a Service Item

Scenario: Our company sells service for the HP Printer.

In this exercise:

- Create a service item for Service for the HP LJ 1320 printer
- 1** Navigate to **Lists > Accounting > Items > New**.
 - 2** From the New Item page, select **Service Item For Sale** this time. The Service for Sale page displays.
 - Item Name/Number field, enter **Service for the HP LJ 1320 Printer**
 - Subsidiary set to **Parent Company** and **Include Children**.
 - 3** Go to the **Sales/Pricing** subtab.
 - 4** Enter the Sales Description = **Regular service for the HP LJ 1320 Printer**.
 - 5** Scroll down to the **USA** sublist and enter **25.00** on the Base Price line.
 - 6** Scroll up and click the **Accounting** subtab.
 - 7** Confirm the Income Account as **4000 Sales**.
 - 8** Select Tax Schedule of **S1**.
 - 9** Go to **Preferences** subtab and note the fields for Can be Fulfilled/Received and Offer Support.
 - 10** Do NOT check but review the field help.
 - 11** Click **Save**.

EXERCISE 05: Create an Inventory Item for OneWorld

Scenario: One of the company's requirements is to track its inventory by location.

In this exercise:

- Enter an item into the German subsidiary
- 1** Navigate to **Lists > Accounting > Items**.
- 2** Click on **View** next to the **HP LJ 1320 Printer** item.
- 3** Navigate to **Actions > Make Copy**.
- 4** Enter **HP Deskjet D2530 Printer (Germany only)** into the Item Name/ Number field.
- 5** Click on **Parent Company: Germany** in the Subsidiary field.
- 6** Uncheck **Include Children**, if necessary.
- 7** Navigate to the **Sales/Pricing** subtab and enter **HP Deskjet D2530 Printer (Germany only)** in the Sales Description field.
- 8** Go to the **Euro** sublist and enter **65.00** in the Base Price field.
- 9** Click **Save**.

SET UP PRICING

Overview and Objectives

Overview

This module introduces ways to accommodate your pricing and billing strategy for goods and services that you sell.

Objectives

After completion of this module, you should be able to:

- ❖ Enable pricing features and defining preferences
- ❖ Create a Price Level
- ❖ Define a Quantity Pricing Schedule
- ❖ Set up a Pricing Group
- ❖ Set up pricing on an item record and customer record
- ❖ Update item prices

Student Exercises

- 01: Enable Pricing Features
- 02: Create a Price Level
- 03: Add Price Level to Items
- 04: Set Up Quantity Based Pricing
- 05: Set Up Item Pricing on a Customer Record
- 06: Use Sales Transactions to Demonstrate Pricing Schemes
- 07: Generate Price Lists

WALKTHROUGH | Review an Item Record

Tasks to be Demonstrated	During this walkthrough, we will review pricing information on an item Record.
Use Case/Scenario	To prepare for working with pricing, review an item record to see how pricing information is stored. As the Administrator , examine the Sales/Pricing subtab:

WALKTHROUGH | Define Pricing Features and Preferences

Tasks to be Demonstrated	Confirm features and preferences
Use Case/Scenario	If you have defined your company's pricing strategy, configure NetSuite to match your needs.

WALKTHROUGH | Using Pricing Features

Tasks to be Demonstrated	During this walkthrough, we will do the following tasks. ➤ Set Up Price Levels ➤ Define Quantity Pricing Schedules ➤ Create a Pricing Group
Use Case/Scenario	Features have been enabled, to accommodate different pricing types, now you can look at using pricing.

WALKTHROUGH | Set Up Item Pricing

Tasks to be Demonstrated	During this walkthrough, we will examine the. ➤ Item Record: Sales/Pricing Subtab
Use Case/Scenario	Examine editing an item and working with a quantity pricing schedule.

WALKTHROUGH | Pricing on a Customer Record

Tasks to be Demonstrated	During this walkthrough, we will go to the customer record and review: ➤ Price Level ➤ Group Pricing ➤ Item Pricing
Use Case/Scenario	Pricing information can be tied to a customer record. The <u>Administrator</u> can review a customer record, set the values and test in a sales transaction.

WALKTHROUGH | Mass Update for Pricing

Tasks to be Demonstrated	During this walkthrough, we will examine: ➤ Update Prices
Use Case/Scenario	Administrators can use a mass update to update prices for items, but there are some considerations

MODULE EXERCISES

Required Exercises	
01	Enable Pricing Features
02	Create a Price Level
03	Add Price Levels to Items
04	Set Up Quantity Based Pricing Schedule
05	Set Up Item Pricing on a Customer Record
06	Use Sales Transactions to Demonstrate Pricing Schemes
07	Generate Price Lists

EXERCISE 01: Enabling Pricing Features

Scenario: Our company's BRD requires that all products have prices. Price levels are established by products. Quantity pricing is also used. And in some situations, prices and price lists are established at the customer level.

Further, prices are defined in the currency of the subsidiary where the transaction occurs.

In this exercise:

- Enable Pricing features

Note: The features in this exercise might be different from those in your purchased NetSuite account.

- 1 Go to **Setup > Company > Enable Features** and go to the **Transactions** subtab.
- 2 In the Sales section, confirm or select **Multiple Prices** and **Quantity Pricing**.
- 3 Scroll down to the Billing section and confirm or uncheck **Advanced Billing**.
- 4 Click **Save**.

EXERCISE 02: Create a Price Level

Scenario: We have enabled multiple pricing, allowing price levels for items. Complete the following in this exercise:

- Create a discounted price level.
- 1 Navigate to **Setup > Accounting > Accounting Lists > New**.
 - 2 The Add to Accounting Lists page displays, select **Price Level** from the available list.
 - 3 Enter the following information:
 - Price Level as **Test Price Level**.
 - Enter the Markup/Discount % as **-8**. After you tab out, the field should display **-8.00%**.
 - Check **Update Existing Prices**.

Note: If you check Update Existing Prices, all items are updated using this price level.

- 4 Click **Save**.
- 5 Click the **List** hyperlink, top-right, to view the list of Price Levels. (You may need to set the list filter to Price Level.)
- 6 Confirm that your Test Price Level is displayed.

EXERCISE 03: Add Price Level to Items

Scenario: In this exercise:

- Add Base Price to item and see discounted price.
- 1** Navigate to **Lists > Accounting > Items**.
 - 2** Click **View** next to Printer Ink Starter Pack.
 - 3** Click **Edit** and go to the **Sales/Pricing** subtab > **USA** sublist.
 - 4** Confirm that **Test Price Level** displays in the list of price levels.
 - 5** Enter **30.00** as the Base Price, in the column under Qty 0, and **Tab** out of the field.
 - 6** Notice that when you do this, the Test Price Level auto fills with the Base Price less the 8% discount, or 27.60.
 - 7** Click **Save**.

EXERCISE 04: Set Up Quantity Based Pricing

Scenario: In some situations, the Chatham Company uses quantity-based pricing.

In this exercise:

- Define Quantity Based Pricing on Item record

- 1 Navigate to **Lists > Accounting > Items**.
- 2 Click **View** next to HP LJ 1320 Printer.
- 3 Click **Edit** and go to the **Sales/Pricing** subtab > **USA** sublist.
- 4 The base price of 50.00 is already entered in the first column.
- 5 For the quantities and their respective prices, enter in columns:

Quantity	5	10	15
Base Price	48	45	40

- 6 Note that Test Price Level for each Quantity:

Test Price Level	44.16	41.40	36.80
-------------------------	-------	-------	-------

- 7 Click **Save**.

EXERCISE 05: Set Up Item Pricing on a Customer Record

Scenario: In this exercise, we will associate a pricing on Customer Record, TEST ABC:

- Select Price Level
- 1** Navigate to **Lists > Relationships > Customers > New**.
 - Company Name: **TEST ABC**
 - Web Address: **www.testabc.com**
 - Email: **abc@testabc.com**
 - Phone: **6506271000**
 - Fax: **6506271001**
 - Primary Subsidiary: **Parent Company**
 - 2** Click the **Financial** subtab.
 - 3** From the Price Level dropdown list, select **Test Price Level**.
 - 4** Click **Save**.

EXERCISE 06: Use Sales Transaction to Demonstrate Pricing Schemes

Scenario: Test customer's assigned price level in a transaction. In this exercise:

- Enter a sales transaction to enter a cash sale.
- 1** Go to **Transactions > Sales > Enter Cash Sales**.
 - Customer: **TEST ABC**
 - Memo: **Testing Pricing**
 - Location: **MidWest**
 - The Date field defaults to today's date.
 - 2** Go to the **Items** subtab > **Item** column.
 - 3** Select **Service for HP LJ 1320 Printer** from the Item dropdown list and click **Add**.
 - 4** Notice that the Quantity defaults to 1. Price Level, Rate, and Amount field automatically populate. Test Price Level populates from the customer record.
 - 5** Go to the **Billing** subtab, scroll down to the **Payment** sublist and from the Payment Method list of value select **Cash** as the Payment Method.
 - 6** Click **OK** if any pop-up windows display.
 - 7** Click **Save**.

EXERCISE 07: Generate Price Lists

Scenario: Price lists for customers are a defined requirement in the BRD.

In this exercise:

- Generate price lists for multiple customers and/or for an individual customer.
 - Note: The price list also reflects those items with a basic price, adjusted by the customer's price level and currency. The base price is used if no price level is specified.
- 1 Navigate to **Transactions > Customers > Generate Price Lists**.
 - 2 In the Currency field, select **Primary Currency**. We only want to print the price list in the customer's primary currency.
 - 3 Check **Assigned Price Levels Only** box, top right-hand side.
 - 4 In the Form field, select **Standard Price List**.
 - 5 On the **Customers** subtab select:
 - **TEST ABC**
 - Check the **Print** box.
 - 6 On the **Items** subtab choose **All** in the Type box.
 - 7 Click **Print**. The Price List opens in a new tab; it displays in the prices list is dependent upon base price and pricing information on the customer record. We are seeing the adjusted Unit Price, based on the Price Level on this customer's record.
 - 8 After reviewing, close the browser tab that is displaying the price list.

ORDER MANAGEMENT

Overview and Objectives

Overview

This module explores:

- Considerations for enabling order management
- Tasks for setting up order management
- The step-by-step process for fulfilling a sales order

Objectives

After completion of this module, you should be able to:

- ❖ Use order management to streamline the fulfillment processes
- ❖ Explore considerations for enabling order management
- ❖ Identify the tasks for setting up order management
- ❖ Determine the step-by-step process for fulfilling a sales order

Student Exercises

- 01: Create an Order - Drop Ship and Special-Order Items
- 02: Define Order Management Preferences
- 03: Enter a Sales Order
- 04: Approve Sales Orders
- 05: Fulfill Sales Orders

WALKTHROUGH | Set Up Order Management

Tasks to be Demonstrated	During this walkthrough, we will: ➤ Enable Multi-Subsidiary Customer Feature ➤ Enable Shipping and Receiving Features ➤ Set Up Defaults and Define Preference
Use Case/Scenario	The administrator, finance, sales, and order managers have discussed some requirements, now it is time to configure NetSuite.

WALKTHROUGH | Order-to-Invoice Process

Tasks to be Demonstrated	During this walkthrough, we will do the following tasks. ➤ Enter Sales Order ➤ Approve Orders ➤ Fulfill Orders ➤ Invoice Sales Order ➤ Print Sales Order Forms
Use Case/Scenario	Start using the forms and move through the various transactions. Finish by printing forms.

WALKTHROUGH | View Sales Order History

Tasks to be Demonstrated	During this walkthrough, we will do the following: ➤ View any subsequent transactions to the sales order.
Use Case/Scenario	NetSuite gathers information on the sales order, related records, so let's look

MODULE EXERCISES

Number	Exercise
01	Create an Order - Drop Ship and Special-Order Items
02	Define Order Management Preferences
03	Enter a Sales order
04	Approve Sales Order
05	Fulfill Sales Order

EXERCISE 01: Create an Order - Drop Ship and Special-Order Items

Scenario: Our company needs to create some items which will be sent directly to the customer from their suppliers (drop ship). They also have some special items which are ordered just-in-time. So, when the sales order is created, a purchase order is automatically created and sent to the supplier. The supplier will then send back the items to our company to fulfil the order.

In this exercise:

- Create Drop Ship and Special-Order Items
- Order the items in a Sales Order

Enable Drop Shipments and Special Orders

- 1 Navigate to **Setup > Company > Enable Features > Items & Inventory** subtab.
- 2 Select **Drop Shipments & Special Orders**.
- 3 Click **Save**.

Create a Non-Inventory Drop Ship Item

- 4 Navigate to **Lists > Accounting > Items > New**.
- 5 From the **New Item** page, locate the Non-inventory Item section and click the **For Resale** link.
- 6 The **Non-inventory Item for Resale** page displays. Enter in the following:
 - ITEM NAME/ NUMBER field, enter **Drop Ship Item**.
 - SUBSIDIARY: **Parent Company**
 - INCLUDE CHILDREN: **Check**
- 7 Go to the **Purchasing** subtab.
- 8 Enter the Purchase Price = **19.95**
- 9 Check **Drop Ship Item**.
- 10 Scroll down to the **Vendors** sublist.
- 11 Choose **Test Widget Works** from the Vendor dropdown list.
- 12 Ensure that **Preferred** is checked.

- 13** Go to the Purchase Prices field, click the icon () to set price by currency.
- 14** In the pop-up window, set the USA Currency Purchase Price at **\$19.95**.
- 15** Click **Add** and then **OK** to close the pop-up window.
- 16** Click **Add**.
- 17** Go to the **Sales/Pricing** subtab > **USA**.
- 18** Enter the Base Price = **30.50**.
- 19** Click the **Accounting** subtab.
- 20** Tax Schedule = **S1**.
- 21** Click **Save**.

Create Two Inventory Items – Special Order and Normal Items

- 22** Navigate to **Lists > Accounting > Items > New**.
- 23** Select **Inventory Item** from the list of available items.
- 24** Enter the following:
 - ITEM NAME/ NUMBER: **Special Order Item**
 - SUBSIDIARY: **Parent Company**
 - INCLUDE CHILDREN: **Check**
- 25** Go to the **Purchasing/Inventory** subtab.
- 26** Enter PURCHASE PRICE = **250.00**.
- 27** Check **Special Order Item**.
- 28** Scroll down and click the **Vendors** sublist.
- 29** Choose **Test Widget Works** from the VENDOR dropdown list.
- 30** Ensure that **Preferred** is checked.
- 31** Go to the PURCHASE PRICES column, click the icon () set price by currency.
- 32** In the pop-up window, set the USA PURCHASE PRICE at **\$250.00**.
- 33** Click **Add** and then **OK** to close the pop-up window.
- 34** Click the **Add** button.

- 35 Go to the **Sales/Pricing > USA** subtab.
- 36 In the BASE PRICE field enter **300.00**.
- 37 Click the **Accounting** subtab.
- 38 Select **S1** from the *TAX SCHEDULE dropdown list.
- 39 Click **Save & New**.
- 40 Enter the following:
 - ITEM NAME/ NUMBER: **Demo Normal Item**
 - SUBSIDIARY: **Parent Company**
 - INCLUDE CHILDREN: **Check**
- 41 Go to the **Purchasing/Inventory** subtab.
- 42 Enter the PURCHASE PRICE = **15.00**.
- 43 Scroll down and click the **Vendors** sublist.
- 44 Choose **Test Widget Works** from the VENDOR dropdown list.
- 45 Ensure that **Preferred** is checked.
- 46 Go the PURCHASE PRICES column, click the icon () to set price by currency.
- 47 In the pop-up window, set the USA Currency PURCHASE PRICE at **\$15.00**.
- 48 Click **Add** and then **OK** to close the pop-up window.
- 49 Click **Add**.
- 50 Go to the **Sales/Pricing > USA** subtab.
- 51 In the BASE PRICE field enter **20.00**.
- 52 Click the **Accounting** subtab.
- 53 Select **S1** from the *TAX SCHEDULE dropdown list.
- 54 Click **Save**.

Enable Multi-Subsidiary to Customer Record

- 55 Go to **Setup > Company > Enable Features**; the **Company** subtab displays.

56 In the **ERP General** section, check the **Multi Subsidiary Customer** to create customer records across multiple subsidiaries.

57 Click **Save**.

Add a Subsidiary to a Customer Record

58 Navigate to **Lists > Relationships > Customers** and confirm or set **Sales Rep** filter to **All**.

59 Click **VIEW** next to Anonymous Customer Parent Company.

60 Click **EDIT** and go to the **Subsidiaries** subtab.

61 From the SUBSIDIARIES dropdown list, select **Germany**. Click **Add**.

62 Click **Save**.

Enter a Sales Order

63 Navigate to **Transactions > Sales > Enter Sales Orders**.

64 From the CUSTOMER field, select **Anonymous Customer Parent Company**.

65 Ensure that SUBSIDIARY is set to **Parent Company**.

66 Change the Status to **Pending Fulfillment**.

67 In the LOCATION field, confirm that **MidWest** is displayed.

68 Go to the **Items** subtab and click **Add Multiple**.

69 Select the following, quantity 1:

- Demo Normal Item
- Drop Ship Item
- Special Order Item

70 Click **Done** and click **OK** if any warnings on inventory levels pop up.

71 Click **Save**. A **Confirmation** indicates that the transaction has been successfully saved.

72 The Processed Orders page displays. Review this page and notice there are only two lines. Note the Processed Transaction Type, Processed Number and Status columns.

73 Right click on the first number link under **Processed Numbers** and open in a new tab/page.

74 Note the item being ordered here and repeat with the other Processed Number.

- One Purchase Order has the Drop Ship Item.
- The other Purchase Order has the Special-Order Item.

EXERCISE 02: Define Order Management Preferences

Scenario: Chatham is ready to configure the system to meet their requirements for processing sales orders through to delivery.

In the Items Module, when setting up items, we enabled features that facilitate order management:

- Advanced Shipping
- Pick, Pack and Ship

In this exercise:

- Define Accounting Preferences for Order Management
- 1 Navigate to **Setup > Accounting > Accounting Preferences**.
 - 2 Click the **Order Management** subtab.
 - 3 Ensure the Default Sales Order Status is set to **Pending Approval**.
 - 4 Set the Default Location for Sales Orders to **MidWest**.
 - 5 Do NOT change the other available default fields.
 - 6 Click **Save**.

EXERCISE 03: Enter a Sales Order

Scenario: As the NetSuite administrator, it is important that you understand the Sales Order process, so you can support your user community.

In this exercise:

- Add inventory to our location
 - Enter a sales order using the Standard Sales Order – Invoice form.
- 1** Navigate to **Transactions > Inventory > Adjust Inventory**.
 - 2** In the Classification section, select the following:
 - Subsidiary: **Parent Company**
 - Adjustment Location: **MidWest**
 - 3** In the Primary Information section, select **Adjustment Account 5090 Inventory Variance**.
 - 4** On the **Adjustment** subtab, select the following:
 - Item: **HP LJ 1320 Printer**
 - Location: **Midwest**
 - Adjust Qty. By: **100**
 - 5** Click **Add**.
 - 6** Add another item and select the following:
 - Select **Printer Ink Starter Pack**
 - Location: **Midwest**
 - Adjust Qty. By: **100**
 - 7** Click **Add**.
 - 8** Click **Save**.
 - 9** Navigate to **Transactions > Sales > Enter Sales Orders**.
 - 10** In the Custom Form field, select **Standard Sales Order – Invoice**. The form you select determines the type of Sales transaction to be processed.
 - 11** In the Form field, Primary Information, perform the following:
 - From the Customer field, select **Test ABC**.

- Leave the default values for **Date** and **Order#**.

Note: Notice that the default Status is Pending Approval. This ensures that the sales order is approved before it is shipped. Setting the status to Pending Fulfillment marks the sales order as approved.

- In the PO# field, enter **12345**
- In the Location field, confirm that **MidWest** is displayed.
- In the Memo field, enter **TEST Order**.

12 Go to the **Items** subtab, select **HP LJ 1320 Printer** from the Item dropdown list.

13 Tab to the Quantity field and enter **10**.

Note: The Price Level defaulted to Test Price Level, per the customer record.

14 Click **Add** to add the item to the order.

15 Select **Printer Ink Starter Pack** to add the item to the order.

16 Tab to the Quantity field and enter **5**.

17 Change the Price Level value to **Custom**.

18 Enter **20.00** in the Unit Price (or Rate) field.

19 Click **Add** to add the item to the order.

20 Click the **Shipping** subtab to enter the shipping Address:

21 In the **Ship To Select** field, click **New**.

22 In the pop-up window, select the following:

- Country: **United States**
- Address 1: **2955 Campus Drive**
- Address 2: **Suite 100**
- Zip: **94403**

23 Click the **Tab** key, on your keyboard, to see City (San Mateo) and State (California) populate.

24 Click **Save**.

25 Click the **Billing** subtab, enter the payment Terms as **Net 30** and confirm that a billing address has been added to the record.

26 Click **Save**. The Sales Order status is Pending Approval.

EXERCISE 04: Approve a Sales Order

Scenario: All Sales Orders need to be approved. In this exercise:

- Approve all the sales order you have created.

- 1 Navigate to **Transactions > Sales > Approve Sales Orders**.
- 2 To approve all the sales orders, click the very top check box; all subsequent check boxes should then automatically be checked.
- 3 If you wanted to approve a single sales order, then you would check the **Approve** box next to the order.

Note: To view the details for any of the sales orders, click the appropriate **Date** link.

- 4 Click **Submit**. The Sales Orders are approved.
- 5 Under Recent Record icon, click on one of the Sales Orders, and note that the Status is Pending Fulfillment.
- 6 You could also go to **Transactions > Sales > Enter Sales Orders > List** to view the status of all sales orders in the system, Pending Fulfillment.

EXERCISE 05: Fulfill Orders

Scenario: The warehouse staff can view the fulfillment queue and fulfill orders; their navigation path may be different.

In this exercise:

- Fulfill the approved sales order.
- 1** Navigate to **Transactions > Order Management > Fulfill Orders**.
 - 2** If necessary, change Filter by field to **Ignore Item Availability**.
 - 3** Set the **Bulk Fulfill From Location to MidWest**, to view each sales order you just created.
 - 4** Click the **Date** link to view the sales order for TEST ABC. Memo column should show Test Order.
 - 5** Click **Fulfill**. The Item Fulfillment page displays.
 - 6** Ensure that the Fulfill boxes are checked for the Printers and the Ink.
 - 7** Enter a memo – **Test Order Fulfillment**.
 - 8** Click **Save**.
 - 9** Go **Home** and click the dropdown arrow **> Set Up in the Reminders** portlet.
 - 10** Click **Add Standard Reminders** and select the following:
 - Orders to Fulfill
 - Orders to Pack
 - Orders to Ship
 - Sales Orders to Invoice
 - 11** Click **Save**.
 - 12** In the Reminders portlet click the **# Order to Pack**. We want to find the order that has the Item fulfillment done in a previous step. The Mark Orders Packed page displays.
 - 13** Bulk Fulfill From Warehouse: defaults to **Unchanged**. Leave that.
 - 14** Check the **Pack** box for the order(s) to process and click **Submit**.
 - 15** Process Status page displays. You can click **Refresh** to see final status.

- 16** Go **Home** and **refresh the Reminders portlet**. This may take a few seconds.
- 17** If necessary, log out, log back in and refresh Reminders portlet.
- 18** The Reminders portlet now reflects #Orders to Fulfill and # Order to ship. Click **# Order to Ship** link.
- 19** The Mark Orders Shipped page displays. Check the **Mark Shipped** box for the order(s) to process and click **Submit**.
- 20** Process Status page displays. The Submission Status needs to read Complete. You can click **Refresh** to see the final status
- 21** Go **Home** and **Refresh the Reminders portlet**. This may take a few seconds. You may need to refresh more than once.
- 22** If necessary, log out, log back in and refresh reminders portlet.
- 23** You now have a link for # Sales Order to Invoice. We will invoice sales orders in the next module.

Note: Because you set the option to Pick, Pack, & Ship (**Set Up > Company > Enable Features > Transactions > Shipping and Receiving**) in an earlier exercise, you must step through each stage of the Fulfillment process to see that transaction in the Invoice Sales Order list.

ACCOUNTS RECEIVABLE

Overview and Objectives

Overview

This module presents an overview of Accounts Receivable.

Objectives

After completion of this module, you should be able to:

- ❖ Describe the A/R process
- ❖ Identify implementation considerations and questions
- ❖ Describe the A/R administrative tasks
- ❖ Identify the Sales Order-to-Payment process steps and the A/R tasks
- ❖ Describe the standard A/R reports

Student Exercises

This module includes the following hands-on exercises:

- 01: Invoice All Sales Orders
- 02: Create a Cash Sale
- 03: Create an Invoice
- 04: Accept Customer Payments
- 05: Issue a Return Authorization (Optional)

WALKTHROUGH | Key Accounts Receivable Tasks

Tasks to be Demonstrated	During this walkthrough, we will review the following: ➤ Accept Customer Payment ➤ Make (bank) Deposits
Use Case/Scenario	The A/R staff routinely process payments and bank deposits

WALKTHROUGH | Additional Accounts Receivable Tasks

Tasks to be Demonstrated	During this walkthrough, we will review the following: ➤ Create Invoices ➤ Generate Statements ➤ Record Customer Deposits ➤ Create a Deposit on a Sales Order ➤ Issue Credit Memos ➤ Process a Return Authorization ➤ Issue Customer Refunds
Use Case/Scenario	These are other tasks that the AR staff can complete.

WALKTHROUGH | Analytics for AR

Tasks to be Demonstrated	During this walkthrough, we will do the following: ➤ Key Performance Indicators ➤ Standard A/R Reports
Use Case/Scenario	The A/R and finance staff can keep up to date on receivables through KPIs and Reports.

MODULE EXERCISES

Required Exercises	
01	Invoice All Sales Orders
02	Create a Cash Sale
03	Create an Invoice
04	Accept Customer Payment
05	Issue a Return Authorization

EXERCISE 01: Invoice All Sales Orders

Scenario: Billing a sales order creates a record of debt owed to you by your customer. When you invoice a sales order, your Accounts Receivable ledger increases by the amount of that bill. Usually, customers are billed for a sale when the items on the order are shipped. Once you ship the items, you bill the customer. In this exercise:

- Invoice Sales order to create Invoices
- 1 Go to **Transactions > Sales > Invoice Sales Orders**. The Invoice Sales Orders page opens.
 - 2 Set the Customer field to **All**, to see all sales order for that customer.
 - 3 The transaction Date defaults to today's date.
 - 4 In the To Be Printed field, choose **Yes**.
 - 5 Click the **Mark All** button.
 - 6 Click **Submit**. You may get a Notice window. You do NOT need to go away from this page.
 - 7 The Process Status page displays showing the invoices being processed. Click the **Refresh** button.
 - 8 When processing is complete, the Submission Status will change to Complete. Review if there were any errors.
 - 9 If we had had zero errors, then when you go to **Transactions > Sales > Invoice Sales Orders** and see that there are no sales orders pending billing.

EXERCISE 02: Create a Cash Sale

Scenario: In this exercise,

- Create a cash sale for a walk-in customer buying an item with cash.

- 1 Navigate to **Transaction > Sales > Enter Cash Sales**; the Cash Sale page opens.
- 2 From the Customer dropdown list, select **Test ABC**.

Note: The Date field defaults to today's date but this can be changed if needed.

- 3 From the Location dropdown list, select **MidWest**.
- 4 Go to the **Items** subtab > **Items** sublist and select **HP LJ 1320 Printer** from the Item dropdown list. Put in a Quantity of **5**.
- 5 Details such as Quantity, Description, and Price Level are automatically populated upon selecting the item. You can change these values as necessary.
- 6 Click the **Add** button to add the line item.
- 7 Click the **Billing** subtab, Payment section and select **Cash** from the Payment Method dropdown list.
- 8 Click **Save** to save the Cash Sale. The Cash Sale page displays with the status of NOT DEPOSITED.

EXERCISE 03: Create an invoice

Scenario: A customer comes into the business, purchases goods, and wants to be billed.

In this exercise:

- Create an invoice for a walk-in customer to be billed later
- 1** Navigate to **Transactions > Sales > Create Invoices**; the Invoice page displays.
- 2** From the Custom Form dropdown list, select **Standard Product Invoice**.
- 3** The Date field defaults to today's date and can be changed if needed.
- 4** From the Customer dropdown list, select **Test ABC**.
- 5** From the Location dropdown list, select **MidWest**.
- 6** Go to the **Items** subtab > **Items** sublist and select **HP LJ 1320 Printer** from the Item dropdown list.
- 7** Quantity, Description, and Price Level are automatically populated for the item. Change the Quantity to **5**.
- 8** Click the **Add** button to add the line item.
- 9** Click the **Billing** subtab, Billing Information section and select **Net 30** as Terms.
- 10** Click the **Save** button to save the Invoice. The Invoice page displays with the status of OPEN.

EXERCISE 04: Accept Customer Payments

Scenario: Sales transactions with payment terms will remain open until customer payments are received. It is time to accept the payment.

In this exercise:

- Accept a customer payment
- 1 Go to **Transactions > Customers > Accept Customer Payments**. The Payment page opens in a new browser tab.
 - 2 From the Customer dropdown list, select **Test ABC**.
 - 3 The form automatically populates with a list of open invoices for this customer and the Date field defaults to today's date. It can be changed if needed.
 - 4 In the center column **Undeposited Funds** selected as the default.
 - 5 Go to the **Apply** subtab > **Invoices** sublist.
 - 6 Check the **Apply** check box for one of the invoices you created in the previous exercise for the Printers, in the amount of \$220.80. Note that the Payment Amount will auto-populate.
 - 7 Go the **Payment Method** subtab. In the Payment Method field, select **Check** and enter Check # as **987**.
 - 8 Click **Save**. The Payment page displays with the status as NOT DEPOSITED.

EXERCISE 05: Issue a Return Authorization

Scenario: In this exercise, you will use test the following functionality:

- Authorize the return of merchandise from our customer **TEST ABC**
 - Approve the return authorization
- 1** Use Global Search, type in **CUS: TEST**.
 - 2** View the Customer record for TEST ABC; go to the **Sales** subtab and the **Transactions** sublist.
 - 3** Click the **Date** hyperlink for their Invoice Paid in Full. (This was for the printers.)
 - 4** Review the Invoice and note that the customer purchased the HP LJ 1320 Printers
 - 5** Click **Authorize Return** . The Return Authorization page opens.
 - 6** Change the items from 5 printers to **2** and click **OK**.
 - 7** Add memo: **Returning 2 printers**.
 - 8** Click **Save**. The Return Authorization is PENDING APPROVAL.
 - 9** Click **Approve Return**. The Return Authorization is PENDING RECEIPT.
 - 10** Click **Receive**. The Item Receipt page displays.
 - 11** Confirm Qty 2 Printers.
 - 12** Add memo: **Receiving 2 printers**.
 - 13** Click **Save**.
 - 14** On the Item Receipt page click the link for the **Return Authorization #**. The Return Authorization is PENDING REFUND.
 - 15** Click **Refund**. The Credit Memo page opens.
 - 16** Go to the **Items** subtab and confirm that 2 printers are listed.
 - 17** On the **Items** subtab, right-hand side, the Auto Apply checkbox is checked. If we leave this as checked then this credit will be applied to the oldest open receivable. **Clear this box**, so that we can later apply the credit to an open receivable.

18 Click **Save**. The Credit Memo status is OPEN until applied to a receivable.

.....
Note: The credit memo is saved. Click **Refund** to issue a check. Or leave the credit memo open, which can then be applied once the customer has a new, unpaid invoice.
.....

INVENTORY TRACKING

Overview and Objectives

Overview

Identify the impact of inventory transactions on inventory levels.

Objectives

After completion of this module, you should be able to:

- ❖ Identify impact of transactions on inventory levels
- ❖ Identify inventory and reporting workflow
- ❖ Identify standard inventory reports

Student Exercises

- 01: Enable Features
- 02: Create Bins
- 03: Assign Items to Bins
- 04: Print Put-Away Worksheet

WALKTHROUGH | Inventory Adjustments

Tasks to be Demonstrated	During this walkthrough, we will view the following forms: ➤ Adjust Inventory ➤ Adjust Inventory Worksheet
Use Case/Scenario	➤ The Administrator will work with the CFO and implementation team to determine options for adjusting inventory.

MODULE EXERCISE

Required Exercise	
01	Enable Features
02	Create Bins
03	Assign Items to Bins
04	Generating the Bin Put-Away Sheet

EXERCISE 01: Enable Features

Scenario: If you are using Bins in your warehouse, you will need to perform some setup first. This includes enabling features, creating the bins and assign the bins to the items.

In this exercise:

- Enable Bin Management features
- 1** Navigate to **Setup > Company > Enable Features**.
 - 2** Click the **Items & Inventory** subtab, scroll down to the Inventory section and confirm that the following features are selected:
 - Multi-Location Inventory
 - Bin Management
 - 3** Click **Save** when you are done.

EXERCISE 02: Create Bins

Scenario: You can use bin records to define bin locations within a warehouse or stock room. Bin record numbers are associated with items and included on receiving and fulfilling transactions to keep track of the on-hand quantity for each bin.

In this exercise:

- Create the Bin Numbers
- 1** Navigate to **Lists > Supply Chain > Bins > New**.
 - 2** Enter the BIN NUMBER as **B1**.
 - 3** Select LOCATION as **MidWest**.
 - 4** Select and click **Save & New**.
 - 5** Enter the BIN NUMBER as **B2**.
 - 6** Select LOCATION as **MidWest**.
 - 7** Click **Save**.

EXERCISE 03: Assign Items to Bins

Scenario: You will need to assign the bin numbers for each inventory item record that you want to track using bins.

In this exercise:

- Assign a bin number to the Printer Cables
- 1** Navigate to **Lists > Accounting > Items**.
 - 2** Click **Edit** next to the Printer Cables item.
 - 3** Navigate to the **Purchasing/Inventory** subtab and scroll down to the **Inventory Management** section.
 - 4** Check **Use Bins**. Review the message and click **OK**.
 - 5** Scroll down further and click on the **Bin Numbers** sublist.
 - 6** Select **Bin Number** as **B1**.
 - 7** Click **Add**.
 - 8** Click **Save**.

EXERCISE 04: Print Put-Away Worksheet

Scenario: Chatham company wants to know what items need to be re-stocked into their bins. By printing the Bin put-away worksheet, Chatham will get a list of these items.

In this exercise:

- Purchase some items and receipt into MidWest
- Print the Put-Away worksheet

Enter a Bill

- 1 Navigate to **Transactions > Payables > Enter Bills**.
- 2 Select Vendor as **Test Widget Works**.
- 3 Navigate to the **Expenses and Items > Items** sublist.
- 4 Select **Item** as **Printer Cables** and **Quantity** as **200**.
- 5 Scroll to right and select **Location** as **MidWest**.
- 6 Click **Add** and **Save**.

Print Bin Put-Away Worksheet

- 7 Navigate to **Transactions > Inventory > Bin Putaway Worksheet**.
- 8 Select **Location** as **MidWest** and note how the list below refreshes. You should see the Printer Cables.
- 9 Click **Print Put-Away List** and review the pop-up window.
- 10 Go back to the main screen and review the **Quantity, Total** and **Bin Numbers**.
- 11 In the Bin Numbers section, click the Bins icon and enter **200** in the Qty field then click **Done**.
- 12 Click **Save** and this will assign the 200 Printer Cables to Bin Number B1.

INCORPORATE MARKETING AND ECOMMERCE

Overview and Objectives

Overview

In this module we look at other ways to “connect” with the public and extend your NetSuite Functionality.

Objectives

After completion of this module, you should be able to:

- ❖ Consider the benefits of NetSuite marketing features
- ❖ Identify NetSuite’s ecommerce features
- ❖ Locate additional NetSuite resources to assist with incorporating marketing and ecommerce into your implementation

Student Exercises

- 01: Enable Web Site
- 02: Create a Basic Intranet

Web Site Components	Site Builder				SuiteCommerce Advanced
	Standard Site	Advanced Site Customization	Hosted HTML	External Catalog Site	SuiteCommerce Advanced Site
Look and Feel	Basic Site Themes and Layouts provided by NetSuite	Limited customization with CSS	Full customization	Full customization	Full customization
Site Setup	Point-and-click Web Site Setup page	Point-and-click Web Site Setup page	Point-and-click Web Site Setup page Uploading HTML pages to file cabinet.	Point-and-click on Web Site Setup page All web development and HTML file hosting outside of NetSuite	Advanced site setup page
Site Templates	Basic templates included	Basic templates included HTML customization capabilities	N/A	N/A	Available through ShopFlow or My Account reference SuiteApps, or create your own SSP application and design your own site templates.
Site Development Tools	Point-and-click	HTML customization capabilities in Themes and Layouts NetSuite Web Site tags	HTML limited JavaScript and SuiteScript	HTML, and JavaScript	HTML, JavaScript, SuiteScript, Commerce API, Item Search API, Bootstrap, Backbone, JQuery
Product Display	Point-and-click	Point-and-click	Add links to NetSuite item records in your custom HTML.	Add links to NetSuite item records in your custom HTML .	Available through Item Search API

WALKTHROUGH | Enable Marketing and Ecommerce

Tasks to be Demonstrated	During this walkthrough, we will look at: ➤ Enable Marketing ➤ Marketing Preferences ➤ Campaign Email Addresses ➤ Domains ➤ Templates ➤ Campaign Records
Use Case/Scenario	Extend ways to communicate with customers and employees

WALKTHROUGH | Simple Website

Tasks to be Demonstrated	During this walkthrough, we will look at: ➤ Previewing a simple web site, via Site Builder
Use Case/Scenario	Investigate Site Builder, the legacy ecommerce solution delivered by NetSuite.

MODULE EXERCISES

Required Exercises	
01	Enable Web Site
02	Create a Basic Intranet

EXERCISE 01: Enable Web Site (Required)

Scenario: In this exercise, you set up a company intranet

- You enable Web site, publishing, and access features.
- As you are working in the demo account, some features have already been enabled. Do NOT un-check any options unless explicitly directed.

Note: Features and functions covered in this course might be different than those in your purchased NetSuite account.

- 1 Go to **Setup > Company > Enable Features** and the **Web Presence** subtab.
- 2 Verify that the following **Web Site** features are checked and do NOT un-check any options unless explicitly directed:
 - Website
 - Site Builder (Web Store)
 - Advanced Site Customization
- 3 Verify that the following **Publishing** features are checked:
 - Host HTML Files
 - Document Publishing
 - Intranet
- 4 Click **Save** when you are done to save your preferences.

EXERCISE 02: Create a Basic Intranet (Required)

Scenario: In this exercise, you set the foundation for an Intranet. You set some preferences for how your Intranet works and you use the standard templates to create its look.

As you build your Intranet using NetSuite's Webstore functionality, remember to refer to both Help and Field Level Help for more information about features and preferences.

Review the Web Site

- 1 Go to **Commerce > Websites > Website List**. We will just review the minimum settings required for an Intranet. You can explore these later.
- 2 **Edit** the "Demo" site.
 - A) You may ignore the Payments processing message.**
- 3 On the **Setup** subtab, **Home Page** section, leave the Web Site Tab option selected in the Web Site Home Page Type field.
- 4 Leave Welcome as the default in the WEB SITE HOME PAGE field.
- 5 Set the DEFAULT HOSTING ROOT field to **Web Site Hosting Files: Live Hosting Files**.
- 6 Click **Save** (and click **OK** in the scripting error pop-up window).

Create a Presentation Tab

- 7 Go to **Commerce > Site Builder > Tabs**.
- 8 Click the **New** button and click on **New Presentation** tab.
- 9 From the **Presentation** Tab screen, in the LABEL field, enter **INTRANET**.
- 10 For the **Category List Layout** field, select any of the preconfigured (Category Layouts).
- 11 For the **Item List Layout** field, select the same preconfigured design, but select the **(Item Layout)** value.

Add a Greeting

- 12 In the GREETING field, type: **Welcome to the Company Intranet!**
- 13 Make the Greeting font bold, italics and center it.
- 14 Add **(greeting)** to the end of the text.

Add a Message

- 15** In the MESSAGE field type **This is the Message field**.
- 16** Under **Audience** subtab, check **Select All** box next to both ROLES and EMPLOYEES.
- 17** Click **Save** when you are done.
- 18** Check for new **INTRANET** Tab in the top navigation row (Home Transactions, etc.... next to your other NetSuite navigation tabs.
- 19** If it is not visible, **edit** the tab and check the **Audience** subtab.

Create a Category

- 20** Go to **Commerce > Site Builder > Categories > New**.
 - 21** In the CATEGORY field, enter **Company Policies**.
 - 22** Select the **Site**
 - 23** From the SUBCATEGORY OF field, select the **INTRANET** Presentation tab we just created: **INTRANET**.
-
- Note:** This will make Company Policies a subcategory of the INTRANET tab.
-
- 24** Select the same layout options you did under Presentation tab, again matching Category and Item Layouts with their matching fields.

Add a Brief Description

- 25** In the BRIEF DESCRIPTION field, type **Find Important Company Policies here** (Brief Description).
- 26** Make the Brief Description font **bold, italics** and **left aligned**.
- 27** Under **Audience** subtab, check **Select All** box next to both ROLES and EMPLOYEES.
- 28** Click **Save** to save these changes.

Note: Category will not be visible until an Information Item or a File are published to it.

Create an Information Item

- 29** Navigate to **Commerce > Site Builder > Information Items > New**.

- 30** Select **Formatted Text**.
- 31** In NAME field, enter **Vacation Policy (Information Item Name)**.
- 32** In BRIEF DESCRIPTION, enter or paste **Employees earns 1 vacation day per month (Brief Description)**.
- 33** In DETAILED DESCRIPTION field, enter or paste: **Our company provides generous paid time off. Each employee accrues the following benefits: Vacation Time, Sick Leave, and Paid holidays.**
- 34** Scroll down to the bottom of the page.
- 35** Site - Demo
- 36** Site Category- INTRANET: Company Policies
- 37** Click **Add**, then click **SAVE**.
- 38** Click on **INTRANET** tab to see the Category and the Information Item you have added.

Publish a File to a Category

- 39** Select any file on your computer. Navigate to **Documents > Files > File Cabinet**.
- 40** Create a **New Folder** and enter these values:
 - FOLDER NAME = **Intranet Files**

Note the various RESTRICT BY ... fields to the right. You can read the Help text associated with them. These dictate who has access to the files in each folder. This is separate from where those files might be published to the Intranet. Leave these blank for this exercise.

- 41** Click **Save**. You should now be in the folder you just created. Check the top left corner of the screen.
- 42** Click **Add File** and select **File** in pop-up window (your choice). Upload will begin.
- 43** Click **Edit** next to file name after upload is complete.
- 44** Navigate to the **Publishing** subtab.
- 45** Note CAPTION field. Add **(caption)** after filename so you can see where it will display. This field has a maximum length of 40 characters so you may need to shorten the filename.

46 Enter text into SITE DESCRIPTION field.

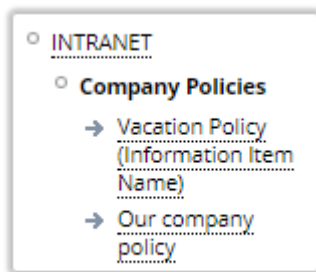

47 Scroll down to the bottom of the page and enter these values at the bottom:

- SITE = DEMO
- SITE CATEGORY = **INTRANET : Company Policies**
- CLICK **Add**

48 Click **Save**. There are now two different controls over access to this File:

- Access to the File through the **Documents > File > File Cabinet** is controlled through the RESTRICT BY...fields on the Folder.
- Viewing of the File through the Intranet is controlled through the Audience tab of the Category or Presentation Tab.

49 The file should be available under Company Policies and **may** display like this

AUDIT AND SYSTEM NOTES

Overview and Objectives

Overview

Identify ways to track changes.

Objectives

After completion of this module, you should be able to use the following:

- ❖ System Notes
- ❖ Transaction Audit Trail (a.k.a. “The Audit Trail”)
- ❖ Transaction Numbering Audit Log
- ❖ Login Audit Trail
- ❖ My Login Audit

Student Exercises

- 01: Comparison Between Login Audit Trail, Transaction Numbering Audit, and System Notes

MODULE EXERCISE

Required Exercise	
01	Comparisons Between Login Audit Trail, Transaction Numbering Audit and System Notes

EXERCISE 01: Comparisons Between Login Audit Trail, Transaction Numbering Audit and System Notes (Required)

Scenario: In this exercise, you will navigate to the different audit options and compare their functionality.

Login Audit Trail

- 1 Navigate to **Setup > Users/Roles > View Login Audit Trail**.
- 2 In the search criteria, enter USER = **Current User Name** of the NetSuite account that you are in now. It may be different from the following screenshot.

The screenshot shows the Oracle NetSuite interface. At the top, the user 'Cathy Cadigan' is logged in. The 'Setup' menu is selected, and the 'Users/Roles' section is active. The 'View Login Audit Trail' page is displayed. The search criteria are as follows:

- USER:** any of
 - Accountant-
 - Anonymous Shopper-
 - Cathy Cadigan Cathy Cadigan** (highlighted)
 - HM Revenue & Customs
 - No Company
- ROLE:** any of
 - A/P Clerk
 - A/R Clerk
 - Accountant
 - Accountant (Reviewer)
- DATE:** within All
- FROM:** (empty)
- TO:** (empty)
- EMAIL ADDRESS:** Any
- IP ADDRESS:** Any
- USER AGENT:** Any
- REQUEST URI:** Any
- STATUS:** ☒ EITHER ☐ SUCCESS ☐ FAILURE
- SECURITY CHALLENGE:** ☒ EITHER ☐ SUCCESS ☐ FAILURE
- TOKEN-BASED APPLICATION NAME:** Any
- TOKEN-BASED ACCESS TOKEN NAME:** Any

- 3 Click **Submit**.
- 4 Write down the column header labels below:

My Login Audit

- 5 Navigate to **Home** page and look for the **My Login Audit** portlet.

.....
Note: If the **My Login Audit** portlet is not on your dashboard, add it by clicking on **Personalize**. The portlet can be found in the Standard Content section.
.....

- 6 Write down the row labels below:

Audit Trail

- 7 Navigate to **Transactions > Management > View Audit Trail**.
- 8 In the search criteria, enter USER = **Current User Name** of the NetSuite account that you are in now.
- 9 Click **Submit**.
- 10 Write down the column header labels below:

Transaction Numbering Audit Log

11 Navigate to **Transactions > Management > Transaction Numbering Audit Log**.

12 Write down the column header labels below:

System Notes

13 Click **Recent Records**.

14 **View** a Customer record.

Note: If there is not one in the dropdown list, click **All Recent Records** to view an extensive list of recent records.

15 Navigate to **System Information > System Notes**.

16 Write down the column header labels below:

GL Impact

17 Click **Recent Records**.

18 **Edit** an Invoice record.

.....
Note: If there is not one in the dropdown list, click **All Recent Records** to view an extensive list of recent records. Take note that you may need to remove data restriction included in a pre-built report.
.....

19 Increase Quantity on any of the line items. Click **Save**.

20 Check that total amount of transaction changes.

21 Navigate to **System Information > System Notes**.

22 Note the Change where FIELD = **Impact**. Take note that you may need to refresh the page first.

23 Click **View**.

Question: What pop up screen appeared?

Answer:

DATA MANAGEMENT

Overview and Objectives

Overview

Examine different management tools.

Objectives

After completion of this module, you should be able to identify the following data management tools and look for related topics in SuiteAnswers:

- ❖ Inline Editing
- ❖ Mass Updates
- ❖ CSV imports
- ❖ CSV export
- ❖ Duplicate detection

RELEASE CYCLES AND LEARNING RESOURCES

Overview and Objectives

Overview

We look at the release cycles and offer some learning resources.

Objectives

After completion of this module, you should be able consider:

- ❖ Cases vs. Issues
- ❖ NetSuite Release Cycles
- ❖ Learning Resources

ROLES, PERMISSIONS, AND SECURITY

Overview and Objectives

Overview

This is a high-level look at access to NetSuite using roles, which are the foundation for data security in your NetSuite Account.

Objectives

After completion of this module, you should be able to:

- ❖ Identify users
- ❖ Examine an overview and impact of roles
- ❖ Investigate layers of access on a role
- ❖ Look at standard roles as the basis for a custom role

Student Exercises

This module includes the following hands-on exercises:

- 01: Show Role Differences
- 02: Customize a Sales Administrator Role OneWorld

WALKTHROUGH | Review Standard Roles and Compare

Tasks to be Demonstrated	During this walkthrough, we will demonstrate the following tasks: ➤ Access Standard Roles ➤ Discuss Administrator Roles ➤ Show Role Differences
Use case/scenario	Prepare the administrator to work with roles: ➤ Look at the standard list of roles, and associated centers, provided in the NetSuite account ➤ Discuss the Administrator Role ➤ Identify difference between roles

MODULE EXERCISES

Required Exercises	
01	Show Role Differences
02	Customize a Sales Administrator Role OneWorld

EXERCISE 01: Show Role Differences (Required)

Scenario: To familiarize yourself with roles, compare permissions between two roles: 1) Sales Manager and 2) Sales Rep

- 1** Navigate to **Setup > Users/Roles > Show Role Differences**.
- 2** Ensure that the **Only Show Differences** box is checked, top right-hand side of the page.
- 3** Click in the **Base Role** field.
- 4** From the Base Role dropdown list, select the **Sales Manager** role.
- 5** In the Compare To field, from the Compare To dropdown list, select the **Sales Administrator** role in the account.
- 6** Click **Show**.
- 7** What are the differences between these roles? Just make note of some of the differences in Lists, Reports, Transactions, and Setup.

EXERCISE 02: Customize a Sales Administrator Role OneWorld

Scenario: The Sales Administrator will work in multiple subsidiaries. In this exercise:

- Create and work with a customized Sales Administrator role to assign to employees in different subsidiaries

- 1 Navigate to **Setup > Users/Roles > Manage Roles**.
- 2 Click **Customize** next to the Sales Administrator role.
- 3 In the Name field enter **CC: Sales Administrator**.
- 4 In the Subsidiary Restrictions section, leave **User Subsidiary** as selected.
- 5 Click **Save**.

Assign Employee Record to a Subsidiary

- 6 Now **Add** the role to your Login (or whichever login name is at the top-right of page) and assign your employee record to the Germany subsidiary.
- 7 Navigate to **Lists > Employees > Employees**.
- 8 Pick the person you are logged in as, named at the top-right of the page (e.g., Cathy Cadigan, Ed Baumann).
- 9 Click the **Edit** link.
- 10 In Subsidiary, select **Germany**.
- 11 Go to the **Access** subtab.
- 12 Add the role for **CC: Sales Administrator**.
- 13 Click **Save**.
- 14 Navigate to **Change Role** in the upper-right corner of the page and then **View My Roles**. If the System Administrator role does not display, then please log out of NetSuite and log back in.
- 15 Enter NetSuite as the **CC: Sales Administrator**.
- 16 If prompted Set Up Security Questions, select three security questions of your choice, and uncheck **Hide Answers**. As your Answer, enter the last word of each question; for example:

- Question: What was your childhood **nickname**
- Answer: **nickname**

17 Click **Save** and click **Close** in the Security Questions Complete pop-up window.

18 Navigate to **Home > Set Preferences > Restrict View** subtab.

Which subsidiaries are listed in the Subsidiary pick list? (Subsidiary is under the Restrict View tab.)

Answer:

Modify the Role to Restrict to Specific Subsidiaries

19 Modify the CC: Sales Administrator role so that only German employees can use this role.

20 Navigate to **Change Role** in the upper-right hand corner of the page.

21 Enter **NetSuite** as the-Administrator.

22 Navigate to **Setup > Users/Roles > Manage Roles**.

23 Click the **Edit** link next to the CC: Sales Administrator role.

24 In the Subsidiary Restrictions section, click the **Selected** radio button.

25 Hold down the **Ctrl** key and select **Parent Company: Germany** and **Parent Company: British Subsidiary** in the Subsidiary field.

26 Click **Save**.

Note: We are NOT modifying the employee record: the employee is still assigned to the Germany subsidiary.

27 Navigate back to **Change Role** and switch to CC: Sales Administrator. If you do not see it, you may need to log out and back in.

28 Navigate to **Home > Set Preferences > Restrict View** subtab.

Which subsidiaries are listed in the Subsidiary pick list?

Answer:

29 Navigate to **Change Role** in the upper-right hand corner of your page.

30 Enter NetSuite as the **Administrator**.

31 If prompted Set Up Security Questions: Select three security questions of your choice and uncheck **Hide Answers**. As your Answer, enter the last word of each question; for example:

Question: What was your childhood **nickname**

Answer: **nickname**

32 Navigate to **Lists > Employees > Employees**.

33 Select your employee record (Cathy Cadigan). Click **Edit**.

34 In the Classification section, change the value in the Subsidiary field back to **Parent Company**.

35 Click **Save**.
